SYNTHETICS

These versatile products open up a multitude of creative design possibilities through their numerous application techniques. They combine elegant crystals from Swarovski that can be applied using Hotfix technology with synthetic carrier materials. They are ideal for use in textile, interior design, jewelry, and accessories segments.

Crystal Rocks, Crystal Fine Rocks and Crystal Ultrafine Rocks are innovative and stunning design elements that showcase different sizes of double-pointed chatons.

Crystal Fabric is another inventive product that consists of a carrier material that is completely covered with millions of tiny cut and uncut crystals.

Crystaltex Bandings are available in a wide range of colors, effects, and a variety of carrier materials, making it the perfect choice for creating a full spectrum of designs.

Small XILION Chatons turn Crystaltex Chaton Bandings into an exciting and luxurious statement in the fashion world.

Crystal Medley - A brilliant design choice. This Swarovski invention emulates naturally grown forms, adding a mysteriously organic effect to glamorous and progressive styles.

Graphic Fabric/Fine Rocks/Rocks - Have your image taken in crystal. The new graphic technology opens up a world of endless design possibilities.

SYNTHETICS

Synthetics such as Crystal Rocks and Crystal Fine Rocks, and Crystal Fabric combine elegant crystals from Swarovski with synthetic carrier materials that can be applied using Hotfix technology. They are ideal for use in the textile, interior design, jewelry, and accessories segments.

GRAPHIC FABRIC, FINE ROCKS & ROCKS

Taking the word "image" from "imagination" and leading it to new creative heights, Swarovski presents a new graphic technology that opens up a world of design possibilities – in an unprecedented richness of detail!

GRAPHIC FABRIC, FINE ROCKS & ROCKS

The new product group Graphic allows for the printing of individual motifs – such as pictures, graphics, logos or letterings – onto the customer favorites Crystal Fabric, Crystal Rocks and Crystal Fine Rocks.

The two different printing methods, either on or below the crystal, or a combination of both enrich your personal motif with a sparkling 3D surface for stunning effects in a series of application fields.

As a true highlight and stunning innovation in our assortment, the Graphic Fabric, Fine Rocks & Rocks speak to the rising demand for personalized design items. It highlights our desire for an individual look in a world of mass production.

GRAPHIC OFFERS DIFFERENT PRINTING METHODS:

Foil Print (FP)

The motif is being printed on the foil below the crystal, which means...

- The brilliance of the crystal remains
- Blurred contours can be used as a design element, e.g. for mille fleurs motifs

Glass Print (GP)

The motif is being printed on crystal, which means...

- Highly precise reproduction of the motif, even of tiny details and small fonts
- No blurring occurs
- Matte effect can be used as a design element

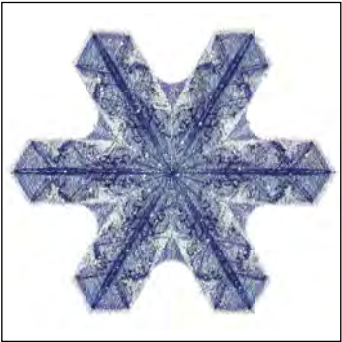

Combination of Foil & Glass Print (FP&GP)

- Spectacular depth effects
- Highlighting special features of the design

SYNTHETICS

GRAPHIC FABRIC, FINE ROCKS & ROCKS

SPECIAL MOTIF SERVICE

A special motif is a design created by the customer that differs to the Graphic Fabric, Fine Rocks & Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to benefit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below).

You can also submit design sketches that meet your personal requirements, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

Required information for Graphic Fabric, Fine Rocks & Rocks

data format contour/outline	vector graphics (.dxf, .ai, .eps., .dwg)
data format picture	raster image format (.tiff, .pdf, .psd, .png) vector format (.ai, .eps, .pdf)
picture resolution & size	min. 300dpi (real size)
colors	RGB or CMYK
fonts	convert text to paths/outlines

Due to the different print methods (foil or glas print), the colors may vary.

If you require information and possible print tolerances (offset, color tolerance...) please contact Swarovski and an application request will be entered into our application database.

CUSTOMIZATION POSSIBILITIES FOR GRAPHIC FABRIC, FINE ROCKS & ROCKS

	GRAPHIC FABRIC	GRAPHIC FINE ROCKS	GRAPHIC ROCKS
Max. motif size	400x330 mm	400x330 mm	400x330 mm
Min. motif size	10x10 mm (or effective surface of 1.0 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)
Min. width of holes within motifs	3 mm	3 mm	3 mm
Min. product surface	3 mm	4 mm	9 mm
Min. size of the smallest element within a motif	10x10 mm (or effective surface of 1.0cm ²)	15x15 mm (or effective surface of 2.25 cm ²)	15x15 mm (or effective surface of 2.25 cm ²)

Due to production issues, motifs with edges and angles of less than 90° need to be rounded off.

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Graphic Fabric, Fine Rocks & Rocks).

You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes are required.

Your special motif will be produced and delivered following your confirmation.

IMPORTANT INFORMATION

Please always submit the drawing of your desired motif in the actual size you require. When enlarged to the desired size, a small sketch will have blurred lines that will make it difficult to correctly reproduce. Full-scale pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via e-mail or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. If the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Due to the tolerance level of the crystals being applied onto carrier film, the final Graphic Fabric, Fine Rocks & Rocks motifs may slightly differ from the sketches or prints in relation to the motifs' outline. Therefore the product may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

If detailed information on possible tolerances (e.g. cavity production for a metal parts) and print tolerances is required (offset, color tolerance...), please contact Swarovski and an application request will be placed in our application database.

If considered feasible, special productions are generally offered to all our customers. Please note: special productions are subject to acceptance by Swarovski and ordering a design does not automatically grant exclusive production of this design for the customer.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL or contact your Swarovski sales office.

Please take care with strong colored fabrics and artificial leather (e.g. denim and alcantara). Some fabrics may bleed after application or washing. If detailed information is required (product information), please contact Swarovski, who will enter an application request into our application database.

CRYSTAL FABRIC

Depending on the color and surface of the carrier material, Crystal Fabric with transparent film changes its look dramatically. Crystal Fabric on a black film creates a deep, mysteriously soft gleam, dressed up with a very alluring sparkle.

Please note: All motifs are available in certain color/film variations (see colormatrix).

A special motif is any individual design created by the customer that differs to the Crystal Fabric Standard, Crystal Inspiration, or Special Collections. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special requirements – such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES FOR CRYSTAL FABRIC

- Max. motif size 600x1800 mm
- Min. motif size of 10x10 mm or effective surface of 1.0 cm²
- Min. width of holes within motifs: 3 mm
- Min. Crystal Fabric surface: 3 mm
- Min. size of the smallest element within a motif: 10x10 mm or effective surface of 1.0 cm²

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Fabric). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 3 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Fabric Motifs may differ from the sketches or prints in relation to the motifs' outline, especially with spaces that are smaller than 3 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note that ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on possible tolerances is required (e.g. cavity production for a metal parts), please contact Swarovski who will enter an application request into our application database.

CRYSTAL ROCKS

The surface and edges of the innovative and luxurious Crystal Rocks are smooth, which offers a whole new range of application possibilities. Crystal Rocks not only creates unique effects on accessories and jewelry, but also enhances textiles in an innovative way.

A special motif is a design created by the customer that differs to the Crystal Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image to suit a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES FOR CRYSTAL ROCKS

- Min. size: 15x15 mm or effective surface of 2.25 cm²
- Max. size: 400x330 mm
- Min. Crystal Rocks surface: 9 mm
- Min. width of holes within motifs: 3 mm
- Min. size of smallest element within a motif:
15x15 mm or effective surface of 2.25 cm²

Due to production issues, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 3 mm.

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks Motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact Swarovski who will enter an application request into our application database.

CRYSTAL FINE ROCKS

Fans of filigree designs will love Crystal Fine Rocks. Small, double-pointed Chatons create a refined surface structure and flexible texture that is thin and lightweight. Available in a wide selection, the washable Crystal Fine Rocks is set to become the star design element across all segments.

A special motif is a design created by the customer that differs to the Crystal Fine Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES FOR CRYSTAL FINE ROCKS

- Min. size: 15x15 mm or effective surface of 2.25 cm²
- Max. size: 400x330 mm
- Min. Crystal Fine Rocks surface: 4 mm¹
- Min. width of holes within motifs: 3 mm
- Min. size of the smallest element within a motif:
15x15 mm or effective surface of 2.25 cm²

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks Motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact Swarovski who will enter an application request into our application database.

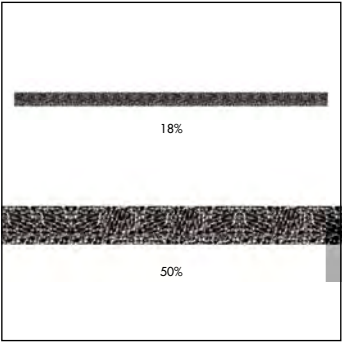

¹ Bandings (strips over 100mm length) in 5 mm width cannot be produced.

CRYSTAL ULTRAFINE ROCKS

Small, double-pointed PP9 Chatons create a refined surface structure and flexible texture that is thin and lightweight. Available in a wide selection, Crystal Ultrafine Rocks is set to become the star design element across all segments.

Please note: All motifs are available in certain color/film variations (see colormatrix).

A special motif is a design created by the customer that differs to the Crystal Ultrafine Rocks Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES FOR CRYSTAL ULTRAFINE ROCKS

- Min. size: 15 x 15 mm or effective surface of 2.25cm²
- Max. size: 400 x 330 mm
- Min. Crystal Ultrafine Rocks surface: 3.4 mm
- Min. width of holes within motifs: 3 mm
- Min. gap between motif outlines: 9 mm

Due to production issues, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1.0 mm (diameter Ø 2.0mm).

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Ultrafine Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact Swarovski who will enter an application request into our application database.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL or contact your Swarovski sales office.

CRYSTAL MEDLEY

Crystal Medley brings together a strong carrier material with a thrilling mix of different elements, including PP 14 and PP 29 double-pointed Chatons.

A special motif is a design created by the customer that differs to the Crystal Medley Standard Collection. This service opens up an abundance of customization possibilities and enables you to profit from Swarovski's longstanding experience and design expertise. A range of customization options for existing motifs is available (see "Customization Possibilities" below). You can also submit design sketches that meet your special needs, such as a brand image or an image for a particular sales campaign. This will then be made up according to your specifications using Computer Aided Design, which means that adjustments can be made easily according to your needs.

CUSTOMIZATION POSSIBILITIES FOR CRYSTAL MEDLEY

- Min. size: 19x19 mm or effective surface of 3.61 cm² ¹
- Max. size: 400x330 mm
- Min. Crystal Medley surface: 9 mm
- Min. width of holes within motifs: 7x7 mm or effective surface of 0.49 cm²
- Min. gap between motif outlines: 6 mm

Due to production issues, motifs with edges and angles of less than 90° need to be rounded off. Tolerance value = 1.5 mm.

TWO-COLORED MOTIFS

Customers are able to create a mixture out of the Crystal Medley standard color assortment (e.g. big double pointed Chatons and small double pointed Chatons in 001 AB and the round uncut elements in 001 CAL).

ORDERING PROCESS

Send your request with the drawing you wish to order to your nearest Swarovski sales office. Make sure you include all measurements for the desired motif. Please also indicate which product group your special motif applies to (Crystal Rocks). You will then receive a quotation including your article number, minimum order quantity, price, and the line drawing of your special motif in PDF format. Please contact your Swarovski sales office again if any changes need to be made. Your special motif will be produced and delivered following your confirmation.

PLEASE NOTE

Please always submit the drawing of your desired motif to represent it in the actual size you require. A small sketch, when enlarged to the desired size, will have blurred lines that will make it difficult to correctly reproduce. Pictures or drawings representing 100% size of the design or very good quality scans in JPG, BMP, or DXF format will ensure that we have clear data to work with. These can also be sent via email or on CD-ROM. If sending a sewing pattern, please include the whole pattern and not just cut-outs. When the sketch is submitted as a hard copy by fax or e-mail, please include a scale legend (e.g. copy/scan with ruler next to the drawing). This will ensure that the desired size of the motif can be identified.

It is generally possible to draw motifs with a minimum gap of 10 mm between the outlines. However, due to the tolerance level of the crystals being applied onto carrier film, the final Crystal Rocks Motifs may differ from sketches or prints in relation to the motifs' outline, especially with regards to spaces that are smaller than 10 mm. Therefore the motif, and by extension, the product itself, may be subject to individual variations with each reproduction. These variations are caused by technical production-related factors. As these variations are not deemed to be defects, warranty claims are excluded and Swarovski assumes no liability whatsoever in connection with them.

Special productions are generally offered to all our customers if these are deemed to be feasible and comply with our General Terms and Conditions. Please note ordering of a design does not grant exclusive production of this design to the customer.

If detailed information on the possible tolerances is required (e.g. cavity production for metal parts), please contact Swarovski who will enter an application request into our application database.

For detailed application information, please refer to the Application Manual and our business website SWAROVSKI.COM/PROFESSIONAL or contact your Swarovski sales office.

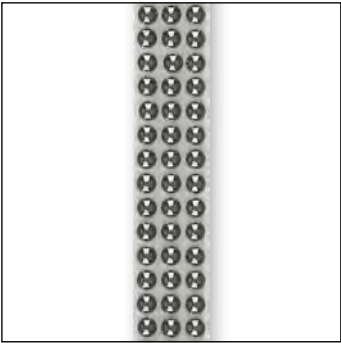

¹ min. size 17x17 mm (or effective surface of 2.89cm²) is possible for customized motifs. Please note: with this reduced minimum size, we cannot guarantee that there will be at least one PP 29 double pointed Chaton on every motif.

CRYSTALTEX CABOCHON BANDINGS

An all-time favorite shows its soft side: the Crystaltex Cabochon Banding pays tribute to nature in all its glory. Reminiscent of raindrops, the carrier material is covered either entirely with sleek Cabochons, giving an opaque look, or with a customized blend of Cabochons and crystal.
